## **COURSE EVALUATION COMMENTS**

**Term & Year: Fall 2006**

**Course Title & Number: PSYC 150.1 Intro to Psychology**

**Instructor Name: Jeremy Gottlieb**

### **1. Please comment on the course.**

I enjoyed this class, learned a lot.

Book were useful and other activities.

I liked the discussions that we had in class.

More papers perhaps? (as opposed to tests or quizzes)

Good lectures.

A little boring.

Good.

The new book is very easy to read and find information from and the diagrams and drawings are very helpful.

I would have liked to have more grades than 4. The lectures were generally interesting.

The text book was really good – a lot of examples to better understand the material. Lecture notes were great – summarizing and pinpointing important topics.

Course material was not used, it was a waste of money.

Use expensive course materials more often ie the book. Well taught course.

I think that he did a good job with teaching the class. I just wish we went over more ??? and other things not so much on cognitive psych.

I would have liked more tests/quizzes.

The powerpoint presentations were useful. It help having them on the website as well.

The lecture didn't really follow the book, but the power point presentations were useful.

The course was very interesting and I enjoyed it. I learned a lot and it was a positive experience.

The notes in class were clear and beneficial. We only wrote one paper, which was somewhat helpful. He used a lot of visual examples that were a huge help.

I found the course to be interesting and am going to be able to use the information I learned in later/future classes.

Would've been interesting I had another teacher.

The class was extremely interesting and every class that I attended made me glad to have joined the course.

The material of the class was well presented. I learned a lot, and in general liked it.

Course was stimulating. Perhaps the use a making more paper assignments would help people learn more.

I think that it would be a good idea to turn in a rough draft and a final draft of the paper instead of just the final copy.

## **2. Please comment on the instructor.**

Teacher knew he stuff and was very knowledgable.

Professor Gottlieb did a good job. He was very informative, but might want to make the material more exciting.

Gottlieb was awesome. Period.

Not open minded and felt as though he was always right no matter what, often rude. Was not open to listening to the students.

Very knowledgable.

The instructor was thorough, organized, and he always made sure to address everyone's questions.

My instructor was always on top of what he was teaching. Always new what he was talking about. Overall good professor.

The instructor was always prepared too and knew what was being talked about.

Was always able to answer questions, always prepared.

I liked the material presented, I wished there was more time to dive deeper into these subjects.

Good instructor, made class fun.

Gottlieb was always enthusiastic about class and willing to answer students questions. Tests were great because they allowed us to explain ourselves and show what we learned.

The instructor clearly has a passion for teaching their subject. He is very knowledgeable of it and is very eager and helpful with all our questions. He is very accessible for extra needed help too.

Good.

He's cynical and does not think about people's feelings.

Gave very good examples for all of the topics discussed in class.

Is a good prof.

I liked him as a teacher.

He was a good professor and helped students.

J.G. my main man Reppin Woodridge/he knows what he is talking about.

It would have been nice to have a syllabus at the start of the course. I wish that the lecture agree with the topics in the book.

I think he should have given review sheets for tests.

Very enthusiastic and helpful.
